

QDII Fund Partner Performance Dashboard

Analytics Project · DBS Bank (China), Private Banking · Business Analyst

The Problem: Performance data from 10+ partner fund managers lived in separate systems, making it slow to **compare products or brief clients** during portfolio reviews.

What I Built

- 1

Portfolio Return Modeling

Ridge regression on macro indicators to forecast term QDII portfolio performance.
- 2

Alpha Analysis (CAPM)

CAPM models across 100+ client portfolios to alpha and flag outperforming holdings.
- 3

Unified Fund Dashboard

SQL pipeline consolidating 10+ fund manager Tableau dashboard for client reviews.
- 4

Client App A/B Testing

Tested layout with Product & IT, cutting drop-off and lifting click-through rate.

Impact

\$2.16M

QDII sales in 2 months

\$43K

Profit in 2 months

32%

Monthly AUM growth

10 hrs

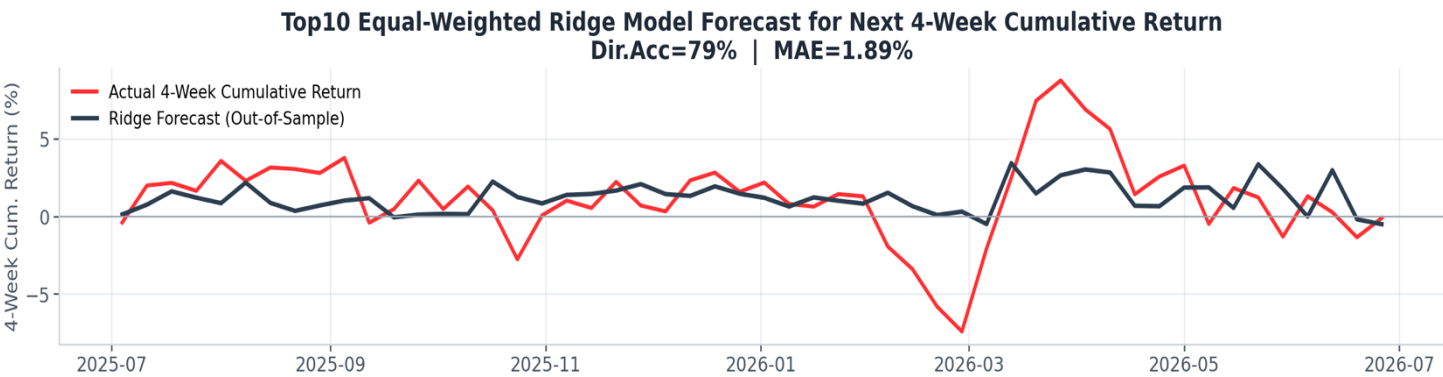

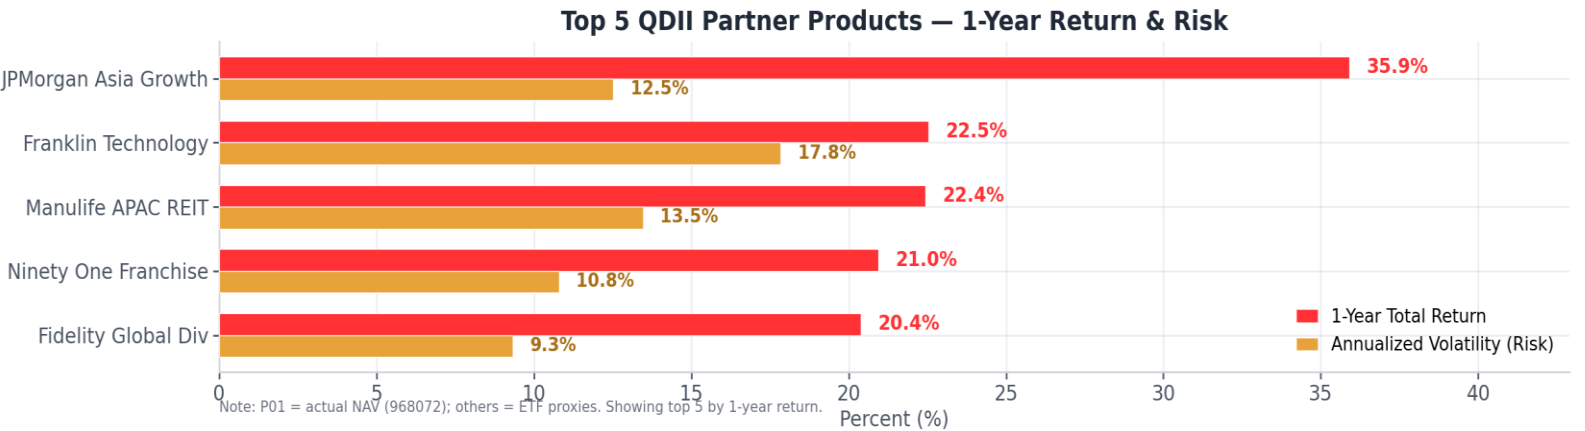

Manual reporting cut

75%→63%

App drop-off reduced

+15%

Click-through rate

Tools & Methods: SQL · Ridge Regression · CAPM · Tableau · A/B Testing

Chart data: DBS China official fund distribution list (dbs.com.cn) & public fund performance, East Money (eastmoney.com), as of Jul 2026. Market data, not DBS proprietary information.
